

Vacuum Forming Wrap Up

Bucks

Take your time – make sure it fits on the model

Always TEST your bucks until the product fits the model

Vacuum Forming

Use the right type of vacuum forming materials.

Dentil 5X5 are my preferred

Don't take platen all the way up to the heating element.

Turn the HEAT off before tuning the Vacuum on

Don't let the Vacuum run

Pulls heated plastic into the air grid

Safety

High Temps

Toxic Materials

Pay Attention while vacuum forming
